

LIGHT COMMERCIAL Energy Recovery Ventilator System for 4 Stations

PRODUCT DESCRIPTION

The Salon Safe Energy Recovery Ventilation kits are composed of multiple products working together to achieve the goal of exhausting harmful vapors that are produced within nail salons. While exhausting these harmful vapors, the Salon Safe Energy Recovery Ventilation kits also provide fresh outside air and eliminates cross-contamination of airflows. The Salon Safe Energy Recovery Ventilation kits are designed to produce very little sound while operating and remain both energy efficient and cost effective. The kits include: a main ERV unit, a 24 VAC Multifunction Control, a 120 VAC In-Line Booster Fan (for long exhaust duct runs), a 120 VAC Positive/Negative Pressure Switch, a CAR-II-HP Balancing Kit (comprised of two CAR-II-HPs) and duct transitions (only on E650-Fi and E1100-Fi model kits). With the easy installation of the Salon Safe Energy Recovery Ventilation kit it is sure to be a reliable option for your salon ventilation needs.

*Recirculation port ducted to conditioned space. Unit installed in conditioned space does not require duct recirculation port
